

# US ARMY SIGNAL CORPS

Fort Gordon, home of the Signal Corps, is the largest communications-electronics facility in the free world. The installation covers 56,000 acres in eastern Georgia immediately adjacent to the city of Augusta and is home to 20,000 personnel. Its missions include all stages of Signal Corps training, the development of communications doctrine and the evaluation of leading edge commercial technology for translation into military capability.

## BATTLE COMMAND BATTLE LABORATORY

Battle Command Battle Laboratory (Gordon) involved in the JWID process since introduction of its forerunner, the annual Secure Tactical Data Network (STDN) demonstration in 1991. It has been a key ARFOR activity and thus the focus for Army throughout the last 9 years. This year the Army demonstrations focus on situational awareness, enhanced space support to the warfighter, and the operational environment.
